## JOKE OF THE DAY

### How to Get The Police To Your House.

An elderly man, from Georgia, was going up to bed, when his wife told him that he'd left the light on in the garden shed, which she could see from the bedroom window. He opened the back door to go turn off the light, but saw that there were people in the shed stealing things.

He phoned the police, who asked "Is someone in your house?" He said "No," but some people are breaking into my garden shed and stealing from me.

Then the police dispatcher said "All patrols are busy. You should lock your doors and an officer will be along when one is available." The old guy said, "Okay." He hung up the phone and counted to 30.

Then he phoned the police again. "Hello, I just called you a few seconds ago because there were people stealing things from my shed. Well, you don't have to worry about them now because I just shot them." and he hung up.

Within five minutes, six Police Cars, a SWAT Team, a Helicopter, two Fire Trucks, a Paramedic, and an Ambulance showed up at the residence, and caught the burglars red-handed.

One of the Policemen said to old guy,

"I thought you said that you'd shot them!"

The wise old man said,

"I thought you said there was nobody available!"

# Senior Wisdom Tips

## Get your Omega 3's! #22

For people who do not like to eat fish, you can use Flaxseeds to get your essential weekly Omega 3 fats. Flaxseeds can be bought at any local nutrition store. Many companies offer the seeds already ground, but can be expensive. You can purchase Flaxseed in bulk for much less money and you can grind them in your coffee grinder. One tablespoon in any meal per day will increase your health. You may also consume the whole flaxseed without grinding them, however, your body does not absorb it as quickly and easily. Stay Healthy! Live Better!

## Too Much Caffeine? #650

I know we all need our caffeine, but make sure you're not getting too much. Too much caffeine (i.e. more than four small cups of coffee) can lead to high blood pressure, an increased heart rate, and more stress (and who needs that?)

## Your sweet tooth may not be as bad as you think #57

Craving chocolate? Have some dark chocolate! Recent research has shown that moderate consumption of dark chocolate may be good for your heart. Supplementing the average American diet with 1/2 an ounce of dark chocolate has shown to have a healthy effect on blood cholesterol levels. So, go ahead and indulge!
